

MCQ Paper – example

Generated Question Paper

MCQ Examination

Name: \_\_\_\_\_

Class: \_\_\_\_\_      Section: \_\_\_\_\_

Roll no.: \_\_\_\_\_

- Instructions:
- Read all questions carefully
  - Mark answers on separate OMR sheet
  - Use question paper for rough work
  - Manage time to complete all sections

SET **A**

Questions: **24**  
Duration: **36min**

Science Fundamentals

*This section covers basic concepts in physical sciences and natural phenomena.*

1. *Analyze this statement about circuits:*  

In series circuits, the same current flows through all components.  
*How does current behave in series circuits?*

A. Current decreases

B. Current alternates

C. Current increases

D. Current stays same

2. **Assertion:**  
Sound travels faster in solids than in gases.  
**Reason:**  
Particles in solids are more closely packed, allowing vibrations to transmit more efficiently.  

A. Assertion correct, reason incorrect

B. Both correct, reason explains assertion

C. Both incorrect

D. Both correct, reason doesn't explain assertion
3. *What is the chemical symbol for water?*

A. O2

B. H2O

C. NaCl

D. CO2

4. Consider the following statement about gravity:
- Statement:
- Objects with greater mass exert stronger gravitational force.
- Is this statement scientifically accurate?
- A. True only in space  
B. True only on Earth  
C. True  
D. False
5. What is the SI base unit for electric current?
- A. Ampere  
B. Volt  
C. Watt  
D. Ohm
6. Read the statement about chemical reactions:
- Chemical reactions need activation energy to proceed.
- What is required for reactions to occur?
- A. High pressure  
B. Low temperature  
C. Activation energy  
D. Presence of water
7. Consider this statement about ecosystems:
- Decomposers break down dead matter and return nutrients to soil.
- What do decomposers do?
- A. Recycle nutrients  
B. Control populations  
C. Produce oxygen  
D. Store energy

8. To measure the volume of an irregularly shaped object, follow these steps:
- A. Record the new water level.  
B. Fill a measuring cylinder with water and note the initial level.  
C. Calculate the difference between final and initial water levels.
- What is the correct sequence?
- A. A → B → C  
B. C → A → B  
C. B → A → C  
D. B → C → A
9. Match the elements with their atomic numbers.
- | Elements    | - | Atomic Numbers |
|-------------|---|----------------|
| A. Hydrogen | - | 8              |
| B. Helium   | - | 6              |
| C. Carbon   | - | 2              |
| D. Oxygen   | - | 1              |
- A. A-1, B-6, C-2, D-8  
B. A-8, B-6, C-2, D-1  
C. A-1, B-2, C-6, D-8  
D. A-2, B-1, C-8, D-6

\* \* \* \* **END** \* \* \* \*

10.

Assertion (A):

Metals are good conductors of electricity.

Reason (R):

Metals have free electrons that can move easily through the material.

A. A is true but R is false.

B. A is false but R is true.

C. Both A and R are true but R is not the correct explanation of A.

D. Both A and R are true and R is the correct explanation of A.
11.

A light ray travels from air into glass.

What phenomenon occurs at the boundary?

A. Reflection only

B. Both reflection and refraction

C. Refraction only

D. Neither reflection nor refraction

12.

Read the following passage about photosynthesis:

Photosynthesis is the process by which green plants and some bacteria convert carbon dioxide and water into glucose using sunlight as energy. This process occurs primarily in the chloroplasts of plant cells. The overall chemical equation is:  $6\text{CO}_2 + 6\text{H}_2\text{O} + \text{light energy} \rightarrow \text{C}_6\text{H}_{12}\text{O}_6 + 6\text{O}_2$ . This process not only produces food for the plant but also releases oxygen as a byproduct, which is essential for most life forms on Earth.

According to the passage, what are the main products of photosynthesis?

A. Glucose and oxygen

B. Carbon dioxide and water

C. Water and energy

D. Sunlight and chloroplasts
13.

Which of the following are states of matter?

i. Solid

ii. Liquid

iii. Gas

iv. Plasma

A. i, ii, and iii only

B. All of the above

C. ii and iii only

D. i and ii only

- Mathematics Basics**  
*This section tests fundamental mathematical concepts and problem-solving skills.*
14. Match the geometric shapes with their number of sides.

Geometric Shapes	-	Number of Sides
A. Triangle	-	6 sides
B. Square	-	4 sides
C. Pentagon	-	5 sides
D. Hexagon	-	3 sides

A. A-3, B-5, C-4, D-6  
B. A-3, B-4, C-5, D-6  
C. A-6, B-4, C-3, D-5  
D. A-4, B-3, C-6, D-5
15. What is the result of  $15 \times 8$ ?

A. 115                      B. 130  
C. 120                      D. 125
16. Which of the following are properties of rectangles?

i. Opposite sides are parallel  
ii. All angles are 90 degrees  
iii. Diagonals are equal in length  
iv. All sides are equal

A. All of the above  
B. ii and iv only  
C. i, ii, and iii only  
D. i and ii only

17. To solve a quadratic equation  $ax^2 + bx + c = 0$  using the quadratic formula:

A. Apply the quadratic formula  $x = \frac{-b \pm \sqrt{b^2 - 4ac}}{2a}$   
B. Identify the coefficients a, b, and c  
C. Simplify to get the final answer(s)

What is the correct order of steps?

A. B → A → C                      B. C → A → B  
C. A → B → C                      D. B → C → A
18. Read the passage about probability:

Probability is a measure of the likelihood that an event will occur. It is expressed as a number between 0 and 1, where 0 means the event cannot happen and 1 means the event is certain to happen. For a fair coin, there are two equally likely outcomes when flipped: heads or tails. Since only one of these two outcomes is the desired result (heads), the probability is calculated as the number of favorable outcomes divided by the total number of possible outcomes.

What is the probability of getting heads when flipping a fair coin?

A. 0.5                      B. 0  
C. 1                      D. 2

19. Assertion:  
The sum of angles in any triangle is 180 degrees.

Reason:  
This is a fundamental theorem in Euclidean geometry.

A. Both incorrect  
B. Both correct, reason doesn't explain assertion  
C. Both correct, reason explains assertion  
D. Assertion correct, reason incorrect
20. Consider the following statements about renewable energy sources:

Statement-1:  
Solar energy is the most widely used renewable energy source globally.

Statement-2:  
Wind power generates electricity without producing greenhouse gas emissions during operation.

Statement-3:  
Hydroelectric power plants can only be built on fast-flowing rivers.

A. 1 and 2 only  
B. All statements are correct  
C. 2 only                      D. 1 and 3 only

21. If  $x + 5 = 12$ , what is the value of x?  
Show your working.

A. 17                      B. 5  
C. 12                      D. 7
22. What is the area of a circle with radius 3 units?

A.  $9\pi$  square units  
B.  $3\pi$  square units  
C.  $18\pi$  square units  
D.  $6\pi$  square units
23. Evaluate the following statement about prime numbers:

Statement:  
Every even number greater than 2 is composite.

A. False  
B. Cannot be determined  
C. True  
D. True only for numbers less than 10
24. Assertion (A):  
The median of a dataset is always one of the values in the dataset.

Reason (R):  
The median is the middle value when data is arranged in order.

A. Both A and R are true and R is the correct explanation of A.  
B. A is true but R is false.  
C. Both A and R are true but R is not the correct explanation of A.  
D. A is false but R is true.
